Introduction

The U.S. housing industry suffers from a chronic shortage of directly oyed labor and subcontractors. While the shortage varies somewhat by trade, by region, and from year to year, over the to year, over the trade outstrips

Community College

The U.S. community college system consists of more than 1,100 public and private institutions. Community colleges may grant students an associate degree as a statemeter credential on steppingstone to a baccalaureate

Work-Based Student Learning

At both the secondary and postecondary levels, schools often encourage students to explore a variety of careeropportunities and gain work experience while they are students. This work experience may be extra curricular or may be during school time and earn credits that meet graduation requirements.

At the high school levéand to some extent at the college level as westitudents may be led through a progression of experiences that help them identify their career interests and abilitimese experiences may include career exploration, career mentoring, service learning, and internship operative experience. Home builders, as potential employers, may interact with students in each of these experiences. For the protection of minors, it is not uncommon for schools to require a background check on potential employers or volunteers working with students under age 18.

Career Exploration

Early exposure to a variety of career opportunities may freelshmenhigh school students (typically -1145 years old) find an area of interest to pursue furtherhome builder might be involved increase exploration activities by:

- ‡ hostingfield trips to job sites
- ‡ providingguest speakers for a studeollub, class, or general student assembly
- ‡ welcoming students on short-term (unpaid) job shadowing
- ‡ participating in career fairs at the school
- ‡ participating in competitions or demonstrations of construction skills, including national events such as SkillsUSAndNAHB Student Competitions local events such as the uild Showcasin Kansas City.

Mentoring

Home builders may interact withigh school ocollegestudents particularly those from underrepresented groups, by acting as career mentors. Assistance on becoming a good mentor is available through organizations such as <u>ACE Mentor</u>, but a home builder may also work through the local <u>HBA, Brother Big Sisters f</u>

<u>America</u> or simplyas an individual mentoring relationship for a home builder snight involve

- ‡ holding regular facto-face or virtual meetings between the mentor and protégé
- ‡ allowing student job shadowing
- ‡ introducing the student to industry professionals the jobsite or athdustry meetings
- ‡ recommending or• ‰ } v• } Œ] v P š Z š μ v š [• u u Œ•Z]‰] v] v μ• š Œ Ç •• }] š
- ‡ helping students understant the expectedwork ethic, academic knowledge chnical skills professional ethics career opportunities and rewards of a career in the home building industry.

Service Leaning

Home builders may provide opportunities for high school or college students to complete const**ruction** community service projects that meet individual course requirements, or that are extracurricular projects for student organizations or club**s**aking part in ^ CEÁ } OCE o _ % µ o]V'"P ž—'äÄCéi9 P %0 _ 'CE P ð ìÉ ç ü J,

The Internship Experience Preparing for an Internship Program Student interns from high school, community college or four

Example training plan activities for high school students might include:

- ‡ Use math to perform quantity takeff of items, lengths, areas and volumes.
- ‡ Read construction drawing is lentify wood and metal framing component perform quantity takeoff.
- ‡ Participate in building layout, including location of lines and corners, squaring the building corners, identifying benchmarks and elevations, and identifying tools, equipment and safety procedures.
- ‡ Participate in building formwork for concrete flatwork fluding

Finding and Hiring Interns

The distribution of CTE programs in the U.S. is geographically unrevoeme states have a greater emphasis on career and technical education at the high school level, and construction at the tweyear or four year college level are limited in number. The home builder looking for a student intern to work part time during the school year may be limited to students from local schools or colleges, while summer integrably college students) may be drawn from a wider geographic area. The decision on which avenue is best may be based on § Z } u % v Ç [• % CE } Æ] u] š Ç š } % in Itial resear the may be verify the volve of the verify and the very significant to the very significant

Career and technical high schools are employn featused and will typically have a placement office to act as the bridge between potential employers and students. The high school guidance office may also be an appropriate point of contactor employers. At the college and university level, employers may contact the placement (or career) office

At both the high school and college level, it is typical in construction for employers to directly contact the faculty or administrator in the consuction program to find interns, arrange interviews, or participate in career fairs. Construction faculty typically have construction experience themselves and are proactive in interacting with companies interested in employing their students. Employers also meet prospective student interns by working with student organizations in construction programs has the NAB Student Chapteproviding speakers for student chapter meetings, hosting field trips to job sites, or sponsoring student teams in construction competitions. The construction faculty is also instrumental in facilitating these types of interactions.

At both the high school and college/university level, potential employers may become involved with the construction department by joining the industry advisory board, or IAB. An IAB informs the academic institution and specific academic program on industry trends and needs of construction employeems as assist in reviewing textbooks and course contecturing accreditation reviews he IAB members often provide support for construction students, faculty and academic programs by donatime, expertise, building materials,

Companies interested in hiring students may also participate in career fairs sponsored by the school. The trend for colleges has been moving career fairs to fall for companies hiring spring semester graduates. Some school host career fairs in both the fall and the spring, and employers are advised to start early to have access to the best students. Career fairs are often coordinated through a career/placement office, but the construction faculty is a good contact for gettg information on upcoming career events.

If no localschoolsoffer construction programs, employes abould not overlook tudents in accounting marketing, computing interior designor architecture and introduce them to the home building industry through these allied fields.

Managing Interns

Because the internsh q 0.0 is viewed as a capstone experience for students who have nearly completed their academic education, the employer of interns has a responsib q lity to provide meaning the that allow the student intern to learn. At both the high school and college level, internships are considered capstone
